Profile

Computer Science graduate specializing in Machine Learning, Cloud Computing, and AI-driven systems. Experienced in building scalable applications, data pipelines, and AI-powered platforms. Strong background in backend development, data analytics, and accessibility-focused technologies, with industry experience at Microsoft, e& Egypt, and Haleon.

Education

The American University in Cairo (AUC)

Bachelor of Science in Computer Science, Minor in Mathematics

Class of 2026 — GPA: 3.55

Technical Skills

Programming: C++, Python, C#, JavaScript

Machine Learning: Scikit-learn, NLP, Model Evaluation, Feature Engineering

Data Analysis: NumPy, Pandas, SciPy

Backend Development: Django, REST APIs

Cloud Computing: Microsoft Azure, Firebase, Power Platform

Databases: PostgreSQL, MySQL

Mobile Development: React Native

Professional Experience

Microsoft Intern

Oct 2025 – Present

- Worked with cloud-based systems and enterprise platforms within Microsoft ecosystem
- Contributed to scalable system design and cloud architecture integration

Machine Learning & Data Intern – e& Egypt

Feb 2025 – Jun 2025

- Developed machine learning-based voice assistant chatbot for customer service automation
- Processed large-scale datasets and implemented preprocessing and evaluation pipelines
- Applied machine learning models in production-oriented environments

Data Analytics Intern – Haleon

Jul 2025 – Aug 2025

- Built dashboards and automated reporting workflows for business analytics
- Analyzed datasets to generate actionable insights for decision-making

Research Assistant – AUC

Sep 2024 – Present

- Developed accessibility-focused systems for interacting with visual data
- Worked on human-computer interaction (HCI) and assistive technology applications

Student Intern – Office of Institutional Equity (AUC)

2024 – Present

- Supported accessibility and inclusion initiatives within institutional systems
- Organized “Safe and Inclusive Campuses in the Arab World” conference
- Delivered accessibility insights to senior university leadership

Accessibility Adviser – Center for Learning and Teaching (AUC)

Sep 2022 – Dec 2022

- Developed accessibility training materials for faculty
- Evaluated digital systems for accessibility compliance

Administrative Assistant – Center for Student Wellbeing (AUC)

Sep 2022 – Jul 2023

- Supported administrative operations and student services
- Assisted in organizing student programs and activities

Projects

Smart Gamify – AI Learning Platform

Azure-Deployed Graduation Project — 2025

- Developed full-stack AI-powered learning platform with multi-user architecture
- Implemented AI systems including:
 - AI-generated assessments
 - NLP-based answer evaluation
 - Conversational AI interview system
 - Personalized AI tutor
- Built adaptive learning engine based on performance analytics
- Designed data pipelines for engagement and performance tracking
- Integrated AI-based proctoring and behavioral analysis
- Deployed application using Microsoft Azure

Project: Smart Gamify Platform

Math Content Recognition System

Computer Vision / OCR — 2025

- Built system for extracting and structuring mathematical expressions
- Applied OCR and pattern recognition techniques for technical content
- Improved accessibility for mathematical content processing

Repository: GitHub Repository

Fraud Detection Model

Machine Learning

- Developed classification model for detecting fraudulent transactions
- Performed data preprocessing, feature engineering, and model evaluation

Leadership & Initiatives

Co-Founder – In2Tech Initiative

2025 – Present

- Founded initiative to expand access to AI and technical education for visually impaired individuals
- Designed accessible training approaches for technology education

Change Leaders Scholar – Cohort Representative

- Led and coordinated a cohort of 94 scholars during a critical transition period
- Managed communication, organization, and continuity of student initiatives

Student Advisory Committee Member – CSW, AUC

- Represented student perspectives in policy and service discussions
- Contributed to improving student wellbeing systems

Peer Tutor – AUC

2024 – Present

- Provided academic support in computer science subjects
- Assisted students in problem solving and technical concepts

First Year Experience (FYE) Peer Leader – AUC

2022 – 2024

- Mentored first-year students and supported academic transition

Community Engagement

Technical Support Specialist – Egypt Visually Impaired Association

2020 – 2022

- Delivered technical training and support for assistive technologies

Facilitator – Be My Eyes

2019 – 2022

- Supported visually impaired users with accessibility tasks

Conferences & Engagement

Representative – COP27 Climate Conference

2022

- Presented student initiatives to international audience and delegation

Attendee – Educational Equal Opportunities Conference

Oct 2021

- Participated in discussions on inclusion and access to education

Achievements

- 3rd Place – Egyptian Collegiate Programming Contest (ECPC)
- Global IT Challenge (GITC) – World Finalist

Languages

Arabic – Native

English – Fluent
